A different kind of financial workspace.

FinEx frontend redesign / Web + mobile / October 2026

THE LEDGER COLLECTION

Money, with a little *perspective.*

A quieter, more personal interface. Warm paper, strong typography and financial details that deserve a closer look.

01 Read the numbers

02 Understand the evidence

03 Practice with intention

DESIGN INTENT A contemporary financial journal: open layouts, clear tables and intentional contrast.

INTERACTION This is a revised proposal. No frontend change is approved until you choose it.

Illustrative design data throughout. Not a live account or market feed.

Shivraj approves the visual design before implementation.

Less decoration. More character.

The design system is small enough to be consistent, and flexible enough to serve each task.

01 / TYPOGRAPHY

The financial *journal.*

Serif for moments of reflection. Sans-serif for actions.
Aligned numerals for comparison.

NUMBERS SHOULD BE EASY TO COMPARE

₹1,24,500.00

Account value +₹5,500

Preview type: Nimbus Roman + Nimbus Sans. Implement the approved equivalent with stable font loading, readable fallbacks and tabular numerals.

02 / MATERIAL & COLOR

Paper / #F8F6F0

Blue / #234BC0

Ink / #242A2B

03 / RESTRAINT IN THE DETAILS

Continue →

Edit details →

Virtual

01 Use dividers before adding containers.

02 Keep charts honest and fully labelled.

03 Make one action visually dominant.

Radii: 4-8px. Borders: 1px. Spacing: 8 / 16 / 24 / 40. Motion: brief, purposeful and reduced when requested.

DESIGN INTENT Cobalt is for action; green and rust carry status. No neon gradients, oversized badges or decorative graphs.

INTERACTION Use visible focus, 48px mobile targets, text labels for status and verified contrast.

Illustrative design data throughout. Not a live account or market feed.

Shivraj approves the visual design before implementation.

An invitation, not a sales pitch.

Welcome / sign-in / consent

finex.

Start with *understanding.*

A place to explore markets, ask better questions and practice with virtual money.

YOUR FINANCIAL WORKSPACE

Learn. Compare. Practice.

WELCOME TO FINEX

Make yourself *at home.*

Create your personal workspace with your Google account.

☑ I agree to the Terms and Privacy Policy, and understand FinEx is an educational platform.

Continue with Google →

Virtual trading only. No real-money orders or brokerage connection are created.

Privacy policy Terms Need help?

DESIGN INTENT A bold typographic welcome replaces the usual generic fintech illustration.

INTERACTION Consent is shown selected here. Disable sign-in until accepted; explain sign-in failure inline.

Illustrative design data throughout. Not a live account or market feed.

Shivraj approves the visual design before implementation.

A short conversation about risk.

Onboarding / investment horizon / reviewable answers

finex. Overview Markets Portfolio Ask FinEx Practice Alerts Goals Spending Demo workspace SD

YOUR PROFILE / QUESTION 02

When might you need this money?

Choose the answer that best reflects your situation. You can change it later.

01 Basics · **02 Time horizon** · 03 Capacity · 04 Review

- Less than 1 year
  Near-term needs
- 1-3 years
  A shorter horizon
- **3-5 years** (selected)
  Some time to stay invested
- More than 5 years
  A longer horizon

← Back

Continue →

WHY THIS MATTERS

Time changes *the conversation.*

An investment horizon helps explain how risk relates to your plans. It does not determine your profile on its own.

About risk profiles →

DESIGN INTENT One question and a single supporting explanation keep the screen calm.

INTERACTION Keep saved answers on Back. Use approved questionnaire wording and deterministic scoring.

The result deserves an explanation.

Risk result / influencing answers / edit and confirm

finex. Overview Markets Portfolio Ask FinEx Practice Alerts Goals Spending Demo workspace SD

YOUR PROFILE / REVIEW

Your risk profile, explained.

Illustrated result only. The application uses your approved questionnaire responses.

ILLUSTRATED PROFILE

Moderate

Your willingness to take risk and your capacity to absorb loss are assessed separately.

Review your answers →

WHAT INFLUENCED THIS RESULT

01 **Investment horizon**

Your selected answer: 3-5 years

02 **Willingness to take risk**

Explained using approved questionnaire responses

03 **Capacity to absorb loss**

Considered separately from personal preference

This describes a profile, not a promise of returns or a recommendation to buy any asset.

Confirm profile →

DESIGN INTENT Give the reasoning as much attention as the category label. Avoid a decorative score gauge.

INTERACTION Show questionnaire/scoring version in details. Never substitute an AI-generated score.

A dashboard with a point of view.

Overview / account context / concentration / next steps

finex. Overview Markets Portfolio Ask FinEx Practice Alerts Goals Spending Demo workspace SD

FRIDAY, 16 OCTOBER

Good morning, Shivraj.

Here is your practice portfolio at a glance.

VIRTUAL ACCOUNT VALUE

₹1,24,500

+₹5,500 unrealized

Illustrative data

HOLDINGS

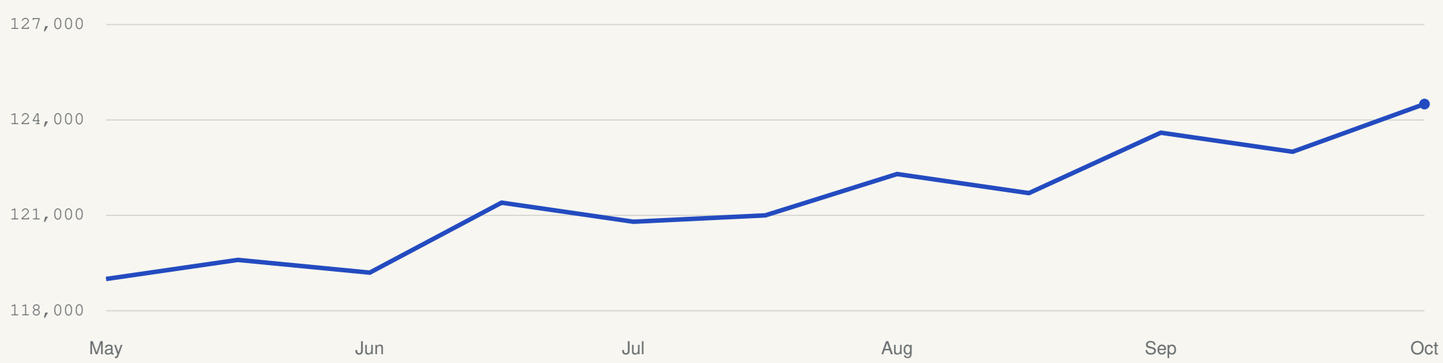

₹99,500

VIRTUAL CASH

₹25,000

ACCOUNT VALUE / INR

MAY - OCT 2026

WORTH A CLOSER LOOK

36.2%

of invested holdings are in TCS. Cash is excluded from this comparison.

Understand concentration →

All values are illustrative. Account value includes holdings and virtual cash.

DESIGN INTENT

Lead with one meaningful number. Place the explanation beside the chart, not inside another generic card.

INTERACTION

From concentration, open the AI assistant with the holdings snapshot attached as evidence.

A watchlist that reads like a market page.

Search / watchlist / prices / provenance

finex.

Overview | Markets | Portfolio | Ask FinEx | Practice | Alerts | Goals | Spending

Demo workspace SD

MARKETS

Keep an eye on what matters.

Illustrative NSE equity watchlist. Prices below are not live quotes.

Search name or symbol ↗

Your watchlist | All instruments

INSTRUMENT	PRICE / INR	DAY CHANGE	ILLUSTRATIVE TREND	STATUS	
R **RELIANCE** Reliance Industries	₹2,500.00	+1.21%		Design sample	→
T **TCS** Tata Consultancy Services	₹3,600.00	-0.80%		Design sample	→
I **INFY** Infosys	₹1,450.00	+0.55%		Design sample	→
H **HDFCBANK** HDFC Bank	₹1,600.00	+0.32%		Design sample	→

Source + observation time + retrieved time are shown when real provider data is connected.

DESIGN INTENT Use restrained row markers and readable columns. Trend lines are secondary to actual prices and status.

INTERACTION Search has no-result and retry states. Add/remove from watchlist without shifting table columns.

An instrument, in context.

Instrument detail / historical price / source status

PRICE / INR

QUOTE DETAILS

PROVIDER

Not connected in mockup

OBSERVED AT

Not a live quote

HISTORY BASIS

Unadjusted illustration

Set price alert →

Practice a trade →

Virtual funds only.

DESIGN INTENT The source panel is permanent context, not a tooltip. Price charts always have units and time labels.

INTERACTION If the quote is stale or unavailable, show its age and disable actions requiring an eligible price.

A portfolio is more than a total.

Holdings / allocation / cost basis / virtual cash

finex. Overview Markets **Portfolio** Ask FinEx Practice Alerts Goals Spending Demo workspace SD

PORTFOLIO

Know what you hold.

Paper portfolio • Figures reconcile across holdings, cash and account value.

HOLDINGS VALUE	COST BASIS	UNREALIZED P&L	VIRTUAL CASH
₹99,500	₹94,000	+₹5,500	₹25,000

INVESTED ALLOCATION / EXCLUDES CASH

TCS 36.2% RELIANCE 25.1% HDFCBANK 24.1% INFY 14.6%

HOLDING	QTY	VALUE	COST BASIS	P&L
RELIANCE	10	₹25,000	₹23,000	+₹2,000
TCS	10	₹36,000	₹34,500	+₹1,500
INFY	10	₹14,500	₹13,500	+₹1,000
HDFCBANK	15	₹24,000	₹23,000	+₹1,000

Virtual account value: ₹99,500 holdings + ₹25,000 cash = ₹1,24,500

DESIGN INTENT A slim allocation strip and a precise ledger replace four disconnected chart widgets.

INTERACTION Selecting a holding opens its detail. The same source snapshot powers the AI explanation.

An assistant that shows its working.

AI answer / portfolio evidence / document citations

finex. Overview Markets Portfolio **Ask FinEx** Practice Alerts Goals Spending Demo workspace SD

ASK FINEX

Let’s look a little closer.

Portfolio context attached • Educational explanation

Which holding is the largest in my portfolio?

TCS is your largest holding.

It represents ₹36,000, or 36.2% of your invested holdings in this illustrated snapshot. Cash is excluded from this allocation. [1]

That is a description of concentration, not a recommendation to buy or sell.

[1] Inspect the holdings used in this answer

Ask a follow-up question… Send →

THE SOURCE DESK

Evidence, alongside *the answer.*

01 / YOUR PAPER PORTFOLIO

Holdings snapshot

TCS · ₹36,000

Invested holdings · ₹99,500

36,000 ÷ 99,500 = 36.2%

FOR PUBLISHED DOCUMENTS

Show the document title, publisher, period and page. Quote the supporting passage and link to the original source.

Data status: illustrative

DESIGN INTENT A reading-room layout gives citations their own place. No glowing AI orb or decorative sparkle icon.

INTERACTION Open evidence without losing the conversation. Missing evidence gets an honest, actionable response.

Practice should still feel deliberate.

Paper order / estimated value / review before submission

finex. Overview Markets Portfolio Ask FinEx **Practice** Alerts Goals Spending Demo workspace SD

PAPER TRADING

Make your first considered move.

Virtual funds only. No real-money order will be placed.

NEW VIRTUAL ORDER

INSTRUMENT

RELIANCE / NSE

SIDE

Buy Sell

QUANTITY

2 shares

Estimated reference price ₹2,500.00

Reference price is illustrative. Execution eligibility and fees must follow the approved backend rules.

ORDER ESTIMATE

₹5,000.00

2 shares × ₹2,500.00

Virtual cash available **₹25,000**

Cash after estimate **₹20,000**

Review virtual order →

You will confirm on the next screen.

DESIGN INTENT The order estimate looks like a calculation, not a stock-market promotion. One primary action advances the flow.

INTERACTION Review includes side, quantity, eligible quote and fees. Show pending status immediately after confirmation.

From intention to a readable receipt.

Confirmation / virtual order history / uncertain status

finex. Overview Markets Portfolio Ask FinEx **Practice** Alerts Goals Spending Demo workspace SD

PAPER TRADING / REVIEW

Check the details. Then confirm.

Review and activity are separate steps in the application; both are shown here for design reference.

CONFIRM VIRTUAL BUY

RELIANCE

2 shares / NSE

Reference price	₹2,500.00
Estimated value	₹5,000.00
Estimated cash after	₹20,000.00

Confirm virtual buy →

← Edit order

AFTER SUBMISSION / ORDER ACTIVITY

Filled

2 RELIANCE • Filled value ₹5,000.00 →

Pending

Awaiting the backend execution result →

Status unknown

Check this order before trying again →

DESIGN INTENT Status is conveyed through language as well as color. Completed orders receive a persistent receipt.

INTERACTION A timeout is not a rejection. Reconcile the existing order ID; prevent duplicate submission.

Attention is a limited resource.

Notifications / trigger conditions / rule controls

finex. Overview Markets Portfolio Ask FinEx Practice **Alerts** Goals Spending Demo workspace SD

ALERTS

Only what needs your attention.

A durable in-app history, even when a push notification fails.

Create alert →

TODAY

09:40 **Price threshold reached**

RELIANCE crossed your illustrated threshold.

View details →

09:15 **Allocation changed**

Review concentration in your practice portfolio.

View details →

08:00 **Monthly goal check-in**

Your emergency fund contribution is due.

View details →

Earlier notifications remain available in history.

PRICE ALERT RULE

INSTRUMENT

RELIANCE

CONDITION

Price above ₹2,600.00

Delivery

In-app + push when available

Save alert →

DESIGN INTENT A timeline expresses sequence naturally. The rule editor is clearly separated from received notifications.

INTERACTION Allow pause, edit and delete. Apply deduplication and cooldown; goal rules require an existing goal.

Plans should feel personal.

Goal list / selected goal / contribution scenario

finex. Overview Markets Portfolio Ask FinEx Practice Alerts **Goals** Spending Demo workspace SD

GOALS

Give your plans a place to grow.

Track actual contributions and label every future scenario.

New goal →

01 Emergency fund

₹60,000 / ₹1,00,000 — 60%

02 New laptop

₹30,000 / ₹75,000 — 40%

03 Higher education

₹50,000 / ₹5,00,000 — 10%

SELECTED GOAL

Your next laptop.

REMAINING

₹45,000

If you set aside ₹5,000 each month…

9 contributions would close the gap. This simple scenario assumes no interest, fees or withdrawals.

Add contribution →

DESIGN INTENT The list uses progress as an accent. A simple object drawing gives the selected goal identity without stock imagery.

INTERACTION Keep saved contributions distinct from an unsaved scenario. The backend computes the result.

Illustrative design data throughout. Not a live account or market feed.

Shivraj approves the visual design before implementation.

Spending, with enough context to act.

Monthly breakdown / category composition / review queue

finex. Overview Markets Portfolio Ask FinEx Practice Alerts Goals **Spending** Demo workspace SD

SPENDING / OCTOBER

A closer look at this month.

Illustrative transactions in INR. Transfers and refunds are excluded from outflow.

Import CSV →

TOTAL OUTFLOW

₹24,800

₹1,400 less than September

Food & dining	₹8,000
Shopping	₹6,500
Transport	₹4,300
Other	₹6,000

REVIEW BEFORE ACCEPTING

4 transactions

need a category check.

Merchant ••42	₹1,200
Merchant ••86	₹650
Merchant ••19	₹2,100

Review categories →

DESIGN INTENT Show category proportions and exact totals together. The correction queue is a clear next action, not an AI claim.

INTERACTION Allow manual changes and show category provenance. Mask private transaction descriptions.

A preview that earns trust.

Column mapping / validation / duplicate handling / confirm

finex. Overview Markets Portfolio Ask FinEx Practice Alerts Goals **Spending** Demo workspace SD

CSV IMPORT / REVIEW

Check before adding.

october-transactions.csv • Nothing has been imported yet.

ROWS FOUND	VALID ROWS	DUPLICATES	NEED CORRECTION
128	120	5	3

DATE	DESCRIPTION	AMOUNT / INR	CATEGORY	VALIDATION
05 Oct 2026	Merchant ••42	₹1,200	Shopping	**Valid**
06 Oct 2026	Merchant ••86	₹650	Transport	**Duplicate**
Invalid date	Merchant ••19	₹2,100	Unassigned	**Fix date**

Duplicates stay excluded. Correct invalid rows or explicitly leave them out before importing the valid selection.

← Back to mapping

Import 120 valid rows →

DESIGN INTENT Use the visual language of a document review: totals, rows, exceptions and one final commit action.

INTERACTION Row errors link to a fix. Confirm exclusion explicitly; show a receipt with imported and skipped counts.

Settings that feel familiar.

Profile / risk / consent / device permissions

finex. Overview Markets Portfolio Ask FinEx Practice Alerts Goals Spending Demo workspace SD

DESIGN INTENT Native-looking rows are more useful here than decorative settings cards. Privacy controls remain easy to locate.

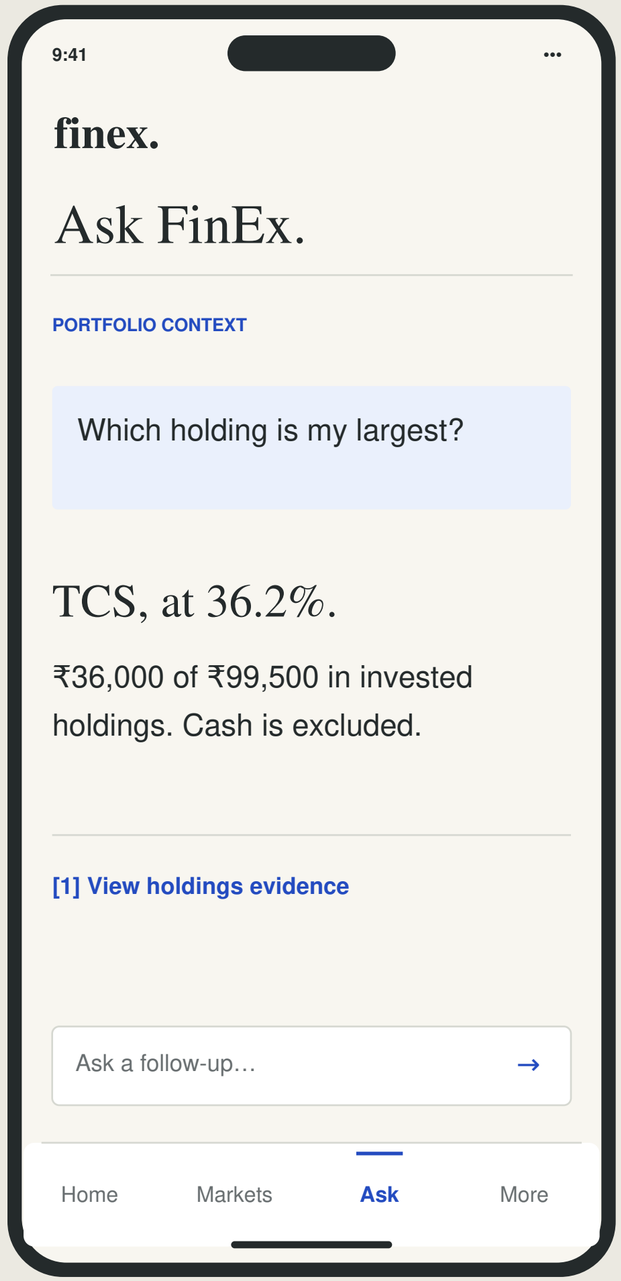

INTERACTION Never show push permission as enabled without checking the device. Confirm any destructive account action.

The same personality, in your pocket.

Mobile / overview / watchlist / evidence-first conversation

DESIGN INTENT Desktop typography and careful spacing survive on mobile. Tables become compact, labelled rows.

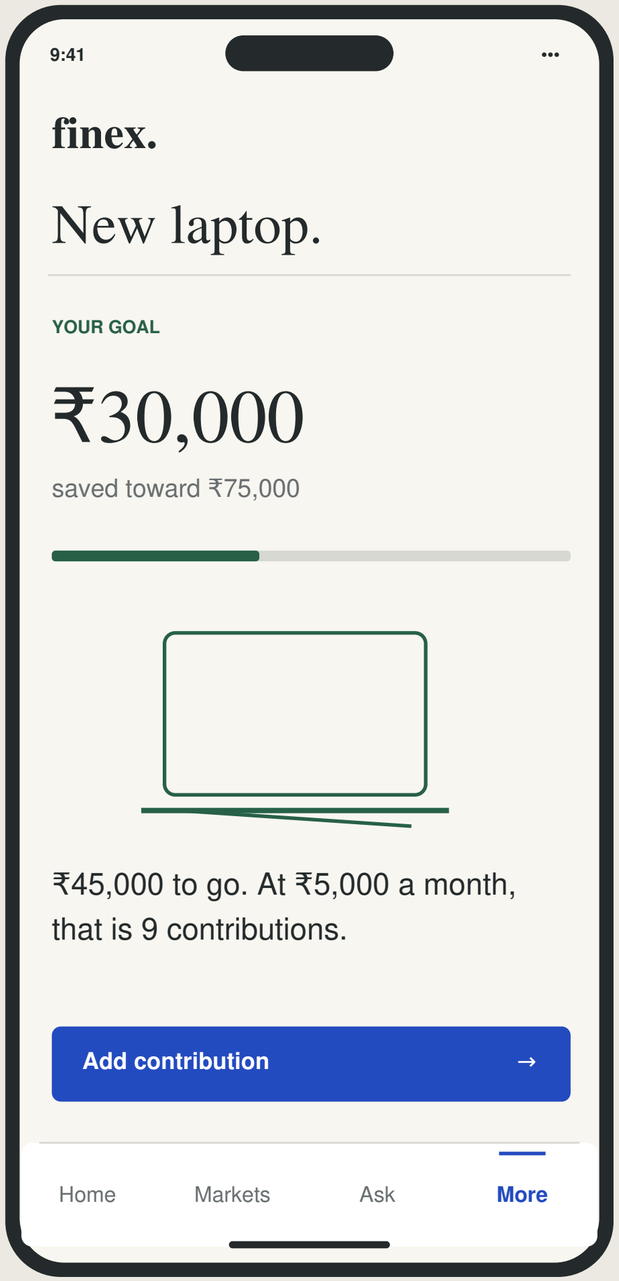

INTERACTION Use four bottom destinations. More opens portfolio, practice, alerts, goals, spending and settings.

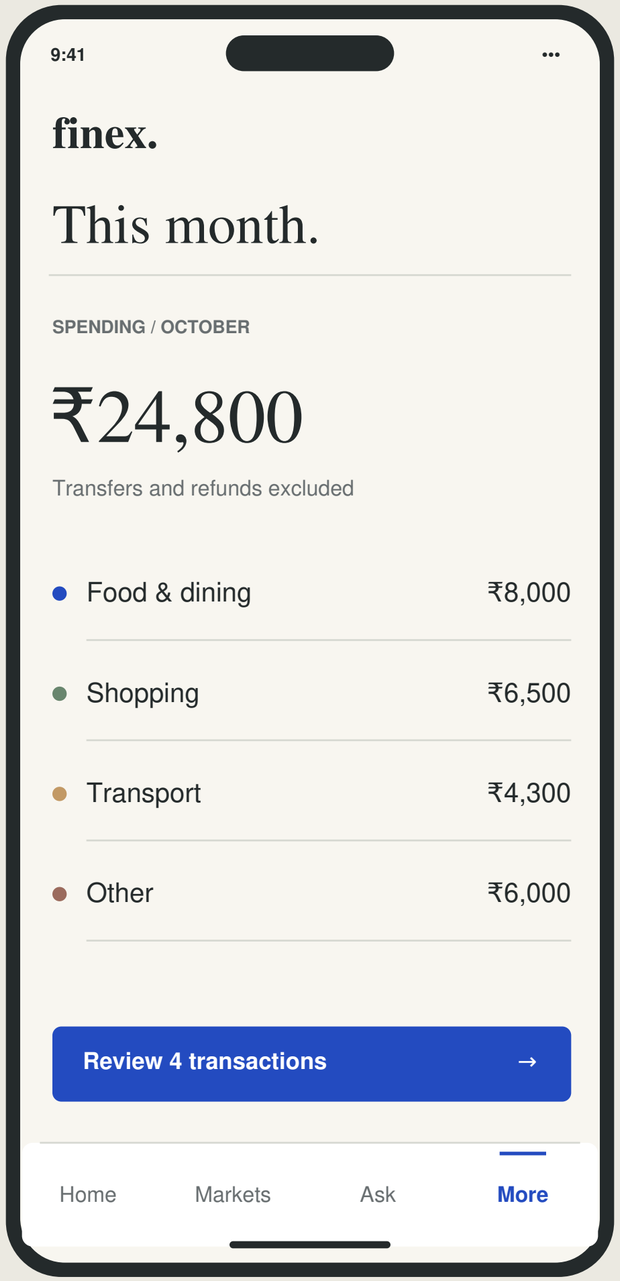

Illustrative design data throughout. Not a live account or market feed.

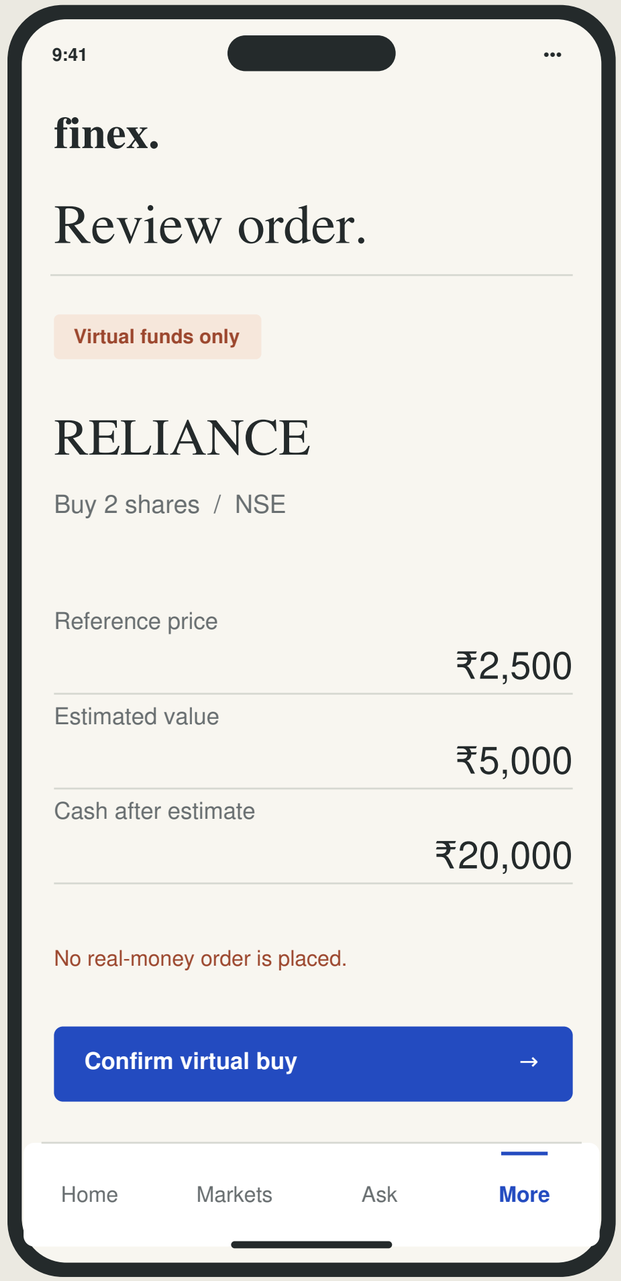

Shivraj approves the visual design before implementation.

Designed for the task in hand.

Mobile / personal goal / spending / paper-order confirmation

DESIGN INTENT Use native vertical rhythm. Important actions sit within thumb reach without obscuring transaction details.

INTERACTION Respect keyboard insets, safe areas, enlarged text and reduced motion. Use a dedicated order review step.

Illustrative design data throughout. Not a live account or market feed.

Shivraj approves the visual design before implementation.

The quiet details make it feel finished.

Loading / empty / delayed / unavailable / uncertain

01 / LOADING

Getting your holdings ready…

02 / EMPTY WATCHLIST

Start with one company.

Follow an instrument you would like to understand.

Search instruments →

03 / DELAYED DATA

The latest quote is delayed.

Show the last observation time and provider. Keep cached prices clearly labelled.

Refresh quote →

04 / PROVIDER UNAVAILABLE

We could not load market data.

Your watchlist is still here. Prices will return when the provider responds.

Try again →

05 / INSUFFICIENT EVIDENCE

I cannot verify that answer.

Ask a narrower question or choose a source document. Never fill the gap with an invented fact.

Choose a source →

06 / ORDER STATUS UNKNOWN

We are checking your order.

Do not place it again yet. Check the existing order so the same request is not submitted twice.

Check order status →

DESIGN INTENT

Real messages and useful next actions replace generic warning boxes. Blank values never become zero.

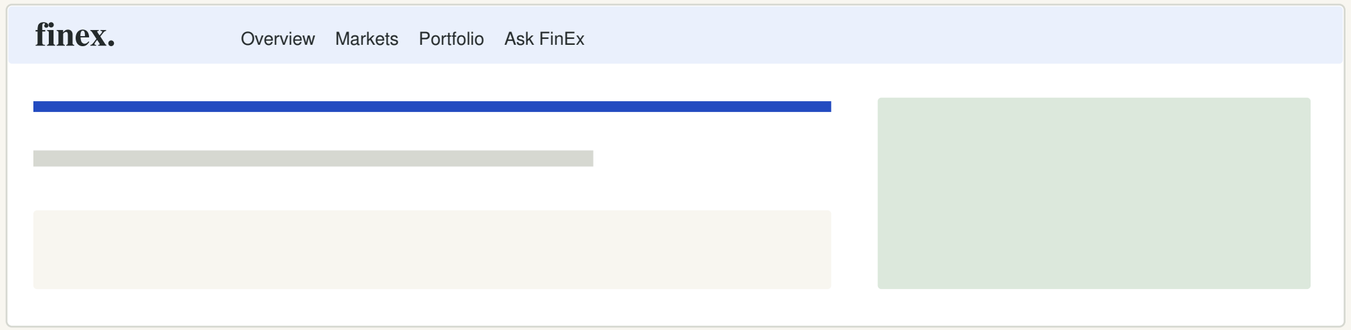

INTERACTION

Announce state changes accessibly. Keep focus stable and preserve the user's input after a failed request.

Details for a faithful implementation.

Responsive behavior / component rules / deliberate motion

RESPONSIVE COMPOSITION

DESKTOP / 1200PX AND ABOVE

Top navigation. A wide primary workspace with a supporting column when it adds context. Tables keep numeric alignment.

TABLET / 768-1199PX

Collapse navigation before it crowds. Stack the evidence or context panel below the primary task.

MOBILE / BELOW 768PX

Single column. Four bottom destinations. Labelled rows replace tables. Evidence opens as a sheet; order review remains a full step.

IMPLEMENTATION CHECKLIST

Type & spacing

Preserve the serif/sans hierarchy. Use a measured spacing scale and aligned financial numerals.

Buttons & focus

One primary action per task. Visible focus. Disabled controls explain the unmet requirement.

Motion

Use 120-180ms transitions for state feedback. Respect reduced motion; no count-up money animations.

Charts & tables

Show units, timestamps and source status. Provide a text summary and accessible data alternative.

Real data

Replace all illustrative values. Connect approved APIs; never ship the mock portfolio as user data.

DESIGN INTENT These proposed breakpoints are layout guidance. Validate them with actual content, not only these mockups.

INTERACTION Check keyboard use, text scaling, contrast, long labels, slow loading and failed requests in React and Flutter.

Illustrative design data throughout. Not a live account or market feed.

Shivraj approves the visual design before implementation.

A clear handoff, with you in control.

Screen coverage / project alignment / instructions for Antigravity

THE COMPLETE VISUAL SET

Identity & onboarding	03-05
Overview, markets & portfolio	06-09
AI assistant & evidence	10
Paper order & status	11-12
Alerts & notification rules	13
Goals & spending	14-15
CSV review & settings	16-17
Mobile views	18-19
States & responsive rules	20-21

Based on the FinEx Combined Implementation Handbook v1.0 (10 Aug 2026). This document defines visual concepts, not new business rules or API behavior.

INSTRUCTION FOR ANTIGRAVITY

Follow the approved design. Ask before *changing it.*

01 Shivraj owns frontend direction. Treat this PDF as a proposal until he approves the screens and details.

02 Preserve the approved layout, type hierarchy, color roles and spacing. Ask about ambiguity; do not invent a replacement theme.

03 Use shared tokens in React and Flutter. Keep all backend integrations and financial calculations aligned with the project handbook.

04 If a technical constraint requires a visible design change, explain it and ask before making the change.

For your review • Editorial concept v2

DESIGN INTENT This revision changes the visual direction substantially while retaining the product's core screen coverage.

INTERACTION Choose the details you approve. Continue backend work independently while visual decisions are pending.
